CAUTIONARY STATEMENT CONCERNING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995, as amended. We also may provide oral or written forward-looking statements in other materials we release to the public. Words such as "will," "may," "could," "would," "should," "anticipates," "believes," "estimates," "expects," "plans," "intends," and similar expressions are intended to identify these forward-looking statements but are not the exclusive means of identifying them. These forward-looking statements reflect the current views of our management as of the filing date of this Quarterly Report on Form 10-Q; however, various risks, uncertainties, contingencies, and other factors, some of which are beyond our control, are difficult to predict and could cause our actual results, performance, or achievements to differ materially from those expressed in, or implied by, these statements.

We assume no obligation to update, amend, or clarify publicly any forward-looking statements, whether as a result of new information, future events, or otherwise, except as required by securities laws. In light of these risks, uncertainties, and assumptions, the forward-looking events discussed in this Quarterly Report on Form 10-Q might not occur.

For further information regarding these and other factors, risks, and uncertainties that could cause actual results to differ, we refer you to the risk factors set forth in Item 1A "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2020.

NEWPARK RESOURCES, INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 – Basis of Presentation and Significant Accounting Policies

Newpark Resources, Inc. is a geographically diversified supplier providing products, as well as rentals and services. The accompanying unaudited condensed consolidated financial statements of Newpark Resources, Inc. and our wholly-owned subsidiaries, which we collectively refer to as "we," "our," or "us," have been prepared in accordance with Rule 10-01 of Regulation S-X for interim financial statements required to be filed with the Securities and Exchange Commission ("SEC"), and do not include all information and footnotes required by the accounting principles generally accepted in the United States ("U.S. GAAP") for complete financial statements. These unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2020. Our fiscal year end is December 31 and our first quarter represents the three-month period ended March 31. The results of operations for the first quarter of 2021 are not necessarily indicative of the results to be expected for the entire year. Unless otherwise noted, all currency amounts are stated in U.S. dollars.

In the opinion of management, the accompanying unaudited condensed consolidated financial statements reflect all adjustments necessary to present fairly our financial position as of March 31, 2021 and our results of operations and cash flows for the first quarter of 2021 and 2020. All adjustments are of a normal recurring nature. Our balance sheet at December 31, 2020 is derived from the audited consolidated financial statements at that date.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. For further information, see Note 1 in our Annual Report on Form 10-K for the year ended December 31, 2020.

We operate our business through two reportable segments: Fluids Systems and Industrial Solutions. Our Fluids Systems segment provides customized drilling, completion, and stimulation fluids solutions to oil and natural gas exploration and production ("E&P") customers primarily in North America and Europe, the Middle East and Africa ("EMEA"), as well as certain countries in Asia Pacific and Latin America. Our Industrial Solutions segment includes our Site and Access Solutions business (historically reported as the Mats and Integrated Services segment), along with our Industrial Blending operations. Site and Access Solutions provides composite matting system rentals utilized for temporary worksite access, along with related site construction and services to customers in various markets including electrical utilities, E&P, pipeline, renewable energy, petrochemical, construction and other industries, primarily in the United States and Europe. We also sell our manufactured composite mats to customers around the world, with electrical utilities being the primary end-market. Our Industrial Blending operations began in 2020, leveraging our chemical blending capacity and technical expertise to enter targeted industrial end-markets.

New Accounting Pronouncements

Standards Adopted in 2021

Income Taxes: Simplifying the Accounting for Income Taxes. In December 2019, the Financial Accounting Standards Board ("FASB") issued new guidance intended to simplify various aspects related to accounting for income taxes. We adopted this new guidance as of January 1, 2021. The adoption of this new guidance had no material impact on our financial statements or related disclosures.

Standards Not Yet Adopted

Debt: Accounting for Convertible Instruments and Contracts in an Entity's Own Equity. In August 2020, the FASB issued new guidance which is intended to simplify the accounting for convertible instruments. This guidance will be effective for us in the first quarter of 2022. As our existing convertible instrument matures in December 2021, we do not expect the adoption of this guidance to have a material impact on our consolidated financial statements or related disclosures.

Note 2 - Earnings Per Share

The following table presents the reconciliation of the numerator and denominator for calculating net loss per share:

| | First Quarter | | | |
|--|---------------|---------|----|----------|
| (In thousands, except per share data) | | 2021 | | 2020 |
| Numerator | | | | |
| Net loss - basic and diluted | \$ | (5,362) | \$ | (12,148) |
| | | | | |
| Denominator | | | | |
| Weighted average common shares outstanding - basic | | 90,701 | | 89,645 |
| Dilutive effect of stock options and restricted stock awards | | _ | | _ |
| Dilutive effect of Convertible Notes | | _ | | _ |
| Weighted average common shares outstanding - diluted | | 90,701 | | 89,645 |
| | | | | |
| Net loss per common share | | | | |
| Basic | \$ | (0.06) | \$ | (0.14) |
| Diluted | \$ | (0.06) | \$ | (0.14) |

We excluded the following weighted-average potential shares from the calculations of diluted net loss per share during the applicable periods because their inclusion would have been anti-dilutive:

| | First Qua | irter |
|---|-----------|-------|
| (In thousands) | 2021 | 2020 |
| Stock options and restricted stock awards | 5,299 | 4,835 |

For the first quarter of 2021 and 2020, we excluded all potentially dilutive stock options and restricted stock awards in calculating diluted earnings per share as the effect was anti-dilutive due to the net loss incurred for these periods. The Convertible Notes (as defined in Note 6) only impact the calculation of diluted net income per share in periods that the average price of our common stock, as calculated in accordance with the terms of the indenture governing the Convertible Notes, exceeds the conversion price of \$9.33 per share. We have the option to pay cash, issue shares of common stock, or any combination thereof for the aggregate amount due upon conversion of the Convertible Notes as further described in Note 6. If converted, we currently intend to settle the principal amount of the notes in cash and as a result, only the amounts payable in excess of the principal amount of the notes, if any, would be assumed to be settled with shares of common stock for purposes of computing diluted net income per share.

Note 3 - Repurchase Program

Our repurchase program remains available for repurchases of any combination of our common stock and Convertible Notes. The repurchase program has no specific term. Repurchases are expected to be funded from operating cash flows, available cash on hand, and borrowings under our ABL Facility (as defined in Note 6). As part of the share repurchase program, our management has been authorized to establish trading plans under Rule 10b5-1 of the Securities Exchange Act of 1934. As of March 31, 2021, we had \$33.8 million remaining under the program.

During the first quarter of 2021, we repurchased \$18.3 million of our Convertible Notes in the open market under the repurchase program for a total cost of \$18.1 million. During the first quarter of 2020, we repurchased \$14.5 million of our Convertible Notes in the open market under the repurchase program for a total cost of \$13.8 million.

There were no shares of common stock repurchased under the repurchase program during the first quarter of 2021 or 2020.

Note 4 - Receivables

Receivables consisted of the following:

| (In thousands) | March | 31, 2021 | Decen | nber 31, 2020 |
|-----------------------------|-------|----------|-------|---------------|
| Trade receivables: | | | | |
| Gross trade receivables | \$ | 126,499 | \$ | 133,717 |
| Allowance for credit losses | | (4,718) | | (5,024) |
| Net trade receivables | | 121,781 | | 128,693 |
| Income tax receivables | | 5,976 | | 6,545 |
| Other receivables | | 5,483 | | 5,807 |
| Total receivables, net | \$ | 133,240 | \$ | 141,045 |

Other receivables included \$4.8 million and \$4.4 million for value added, goods and service taxes related to foreign jurisdictions as of March 31, 2021 and December 31, 2020, respectively.

We adopted the new accounting guidance for credit losses as of January 1, 2020.

Changes in our allowance for credit losses were as follows:

| | First Quarter | | | | | | |
|--|---------------|-------|----|-------|--|--|--|
| (In thousands) | | 2021 | | 2020 | | | |
| Balance at beginning of period | \$ | 5,024 | \$ | 6,007 | | | |
| Cumulative effect of accounting change | | _ | | 959 | | | |
| Credit loss expense | | 50 | | 20 | | | |
| Write-offs, net of recoveries | | (356) | | (845) | | | |
| Balance at end of period | \$ | 4,718 | \$ | 6,141 | | | |

Note 5 - Inventories

Inventories consisted of the following:

| (In thousands) | | March 31, 2021 | Dece | mber 31, 2020 |
|-----------------------------------|----|----------------|------|---------------|
| Raw materials: | | | | |
| Fluids systems | \$ | 99,223 | \$ | 98,974 |
| Industrial Solutions | | 6,490 | | 6,315 |
| Total raw materials | _ | 105,713 | | 105,289 |
| Blended fluids systems components | | 30,415 | | 31,744 |
| Finished goods - mats | | 3,785 | | 10,824 |
| Total inventories | \$ | 139,913 | \$ | 147,857 |

Raw materials for the Fluids Systems segment consists primarily of barite, chemicals, and other additives that are consumed in the production of our fluids systems. Raw materials for the Industrial Solutions segment consists primarily of resins, chemicals, and other materials used to manufacture composite mats and cleaning products, as well as materials that are consumed in providing spill containment and other services to our customers. Our blended fluids systems components consist of base fluid systems that have been either mixed internally at our blending facilities or purchased from third-party vendors. These base fluid systems require raw materials to be added, as needed to meet specified customer requirements.

Note 6 – Financing Arrangements and Fair Value of Financial Instruments

Financing arrangements consisted of the following:

| | March 31, 2021 | | | | | December 31, 2020 | | | | | | | | | | | | | | | | | | | |
|-----------------------|----------------|---------------------|----|--|----|-------------------|----|---|----|--------------------------|----|----------------|--|--|--|--|--|--|--|--|--|--|--|--|------------|
| (In thousands) | | Principal Amount | | Unamortized Discount and Debt Issuance Costs | | Total Debt | | Unamortized Principal Discount and Debt Amount Issuance Costs | | Principal Discount and l | | Principal Disc | | | | | | | | | | | | | Total Debt |
| Convertible Notes | \$ | 48,567 | \$ | (2,273) | \$ | 46,294 | \$ | 66,912 | \$ | (4,221) | \$ | 62,691 | | | | | | | | | | | | | |
| ABL Facility | | 11,000 | | _ | | 11,000 | | 19,100 | | _ | | 19,100 | | | | | | | | | | | | | |

Convertible Notes. In December 2016, we issued \$100.0 million of unsecured convertible senior notes ("Convertible Notes") that mature on December 1, 2021, of which \$48.6 million principal amount was outstanding at March 31, 2021. The notes bear interest at a rate of 4.0% per year, payable semiannually in arrears on June 1 and December 1 of each year.

Holders may convert the notes at their option at any time prior to the close of business on the business day immediately preceding June 1, 2021, only under the following circumstances:

- during any calendar quarter (and only during such calendar quarter) if the last reported sale price of our common stock for at least 20 trading days (regardless of whether consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price of the notes in effect on each applicable trading day;
- during the five business day period after any five consecutive trading day period in which the trading price per \$1,000 principal amount of notes for each trading day was less than 98% of the last reported sale price of our common stock on such date multiplied by the conversion rate on each such trading day; or
- upon the occurrence of specified corporate events, as described in the indenture governing the notes, such as a consolidation, merger, or share exchange.

On or after June 1, 2021 until the close of business on the business day immediately preceding the maturity date, holders may convert their notes at any time, regardless of whether any of the foregoing conditions have been satisfied. As of May 3, 2021, the notes were not convertible.

The notes are convertible into, at our election, cash, shares of common stock, or a combination of both, subject to satisfaction of specified conditions and during specified periods, as described above. If converted, we currently intend to pay cash for the principal amount of the notes converted. The conversion rate is 107.1381 shares of our common stock per \$1,000 principal amount of notes (equivalent to an initial conversion price of \$9.33 per share of common stock), subject to adjustment in certain circumstances. We may not redeem the notes prior to their maturity date.

In accordance with accounting guidance for convertible debt with a cash conversion option, we separately accounted for the debt and equity components of the notes in a manner that reflected our estimated nonconvertible debt borrowing rate. As of March 31, 2021, the carrying amount of the debt component was \$46.3 million, which is net of the unamortized debt discount and debt issuance costs of \$2.3 million. Including the impact of the unamortized debt discount and debt issuance costs, the effective interest rate on the notes is approximately 11.3%.

During the first quarter of 2021, we repurchased \$18.3 million of our Convertible Notes in the open market for a total cost of \$18.1 million, and recognized a net loss of \$0.8 million reflecting the difference in the amount paid and the net carrying value of the extinguished debt, including original issue discount and debt issuance costs.

Asset-Based Loan Facility. In May 2016, we entered into an asset-based revolving credit agreement, which was amended in October 2017 and in March 2019 (as amended, the "ABL Facility"). The ABL Facility provides financing of up to \$200.0 million available for borrowings (inclusive of letters of credit) and can be increased up to a maximum capacity of \$275.0 million, subject to certain conditions. As of March 31, 2021, our total availability under the ABL Facility was \$88.3 million, of which \$11.0 million was drawn, resulting in remaining availability of \$77.2 million.

The ABL Facility terminates in March 2024; however, the ABL Facility has a springing maturity date that will accelerate the maturity of the ABL Facility to September 1, 2021 if, prior to such date, the Convertible Notes have not been repurchased, redeemed, refinanced, exchanged or otherwise satisfied in full or we have not escrowed an amount of funds, that together with the amount that we establish as a reserve against our borrowing capacity, is sufficient for the future settlement of the Convertible Notes at their maturity. The ABL Facility requires a minimum consolidated fixed charge coverage ratio of 1.25 to 1.0 calculated based on the trailing twelve-month period ended June 30, 2021 and remaining unused availability of at least \$25.0 million to utilize borrowings or assignment of availability under the ABL Facility towards funding the repayment of the Convertible Notes.

Borrowing availability under the ABL Facility is calculated based on eligible U.S. accounts receivable, inventory, and, subject to satisfaction of certain financial covenants as described below, composite mats included in the rental fleet, net of reserves and limits on such assets included in the borrowing base calculation. To the extent pledged by us, the borrowing base calculation also includes the amount of eligible pledged cash. The lender may establish such reserves, in part based on appraisals of the asset base, and other limits at its discretion which could reduce the amounts otherwise available under the ABL Facility. Availability associated with eligible rental mats will also be subject to maintaining a minimum consolidated fixed charge coverage ratio of 1.5 to 1.0 and at least \$1.0 million of operating income for the Site and Access Solutions business, each calculated based on a trailing twelve-month period.

As of May 3, 2021, our total availability under the ABL Facility was \$82.6 million, of which \$16.0 million was drawn, resulting in remaining availability of \$66.5 million. This availability under the ABL Facility excludes \$24.2 million related to eligible rental mats as we failed to satisfy the required minimum consolidated fixed charge coverage ratio, as measured on the trailing twelve-month period ended March 31, 2021. We expect to satisfy the minimum consolidated fixed charge coverage ratio as required to include eligible rental mats in the borrowing availability under the ABL Facility following the second quarter of 2021 and expect to satisfy the June 30, 2021 ABL Facility requirements to be able to utilize borrowings or assignment of availability under the ABL Facility towards funding the repayment of the Convertible Notes prior to September 1, 2021.

Under the terms of the ABL Facility, we may elect to borrow at a variable interest rate based on either, (1) LIBOR subject to a floor of zero or (2) a base rate equal to the highest of: (a) the federal funds rate plus 50 basis points, (b) the prime rate of Bank of America, N.A. and (c) LIBOR, subject to a floor of zero, plus 100 basis points, plus, in each case, an applicable margin per annum. The applicable margin ranges from 150 to 200 basis points for LIBOR borrowings, and 50 to 100 basis points for base rate borrowings, based on the consolidated fixed charge coverage ratio as defined in the ABL Facility. As of March 31, 2021, the applicable margin for borrowings under our ABL Facility was 200 basis points with respect to LIBOR borrowings and 100 basis points with respect to base rate borrowings. The weighted average interest rate for the ABL Facility was 2.1% at March 31, 2021. In addition, we are required to pay a commitment fee on the unused portion of the ABL Facility ranging from 25 to 37.5 basis points, based on the level of outstanding borrowings, as defined in the ABL Facility. As of March 31, 2021, the applicable commitment fee was 37.5 basis points.

The ABL Facility is a senior secured obligation, secured by first liens on substantially all of our U.S. tangible and intangible assets, and a portion of the capital stock of our non-U.S. subsidiaries has also been pledged as collateral. The ABL Facility contains customary operating covenants and certain restrictions including, among other things, the incurrence of additional debt, liens, dividends, asset sales, investments, mergers, acquisitions, affiliate transactions, stock repurchases and other restricted payments. The ABL Facility also requires a minimum consolidated fixed charge coverage ratio of 1.0 to 1.0 calculated based on a trailing twelve-month period if availability under the ABL Facility falls below \$22.5 million. In addition, the ABL Facility contains customary events of default, including, without limitation, a failure to make payments under the facility, acceleration of more than \$25.0 million of other indebtedness, certain bankruptcy events, and certain change of control events.

Other Debt. In February 2021, a U.K. subsidiary entered a £6.0 million (approximately \$8.3 million) term loan facility that matures in February 2024, the proceeds of which were used to pay down the ABL Facility. The term loan bears interest at a rate of LIBOR plus a margin of 3.4% per year, payable in quarterly installments of £375,000 plus interest beginning March 2021 and a £1.5 million payment due at maturity. We had \$7.8 million outstanding under this arrangement at March 31, 2021.

Certain of our other foreign subsidiaries maintain local credit arrangements consisting primarily of lines of credit or overdraft facilities which are generally renewed on an annual basis. We utilize local financing arrangements in our foreign operations in order to provide short-term local liquidity needs. We had \$6.5 million and \$3.5 million outstanding under these arrangements at March 31, 2021 and December 31, 2020, respectively.

In addition, at March 31, 2021, we had \$50.2 million in outstanding letters of credit, performance bonds, and other guarantees for which certain of the letters of credit are collateralized by \$5.8 million in restricted cash.

Our financial instruments include cash and cash equivalents, receivables, payables, and debt. We believe the carrying values of these instruments, with the exception of our Convertible Notes, approximated their fair values at March 31, 2021 and

December 31, 2020. The estimated fair value of our Convertible Notes was \$48.1 million at March 31, 2021 and \$61.1 million at December 31, 2020, based on quoted market prices at these respective dates.

Note 7 - Income Taxes

The provision for income taxes was \$3.0 million for the first quarter of 2021, despite reporting a pretax loss for the period, primarily reflecting the impact of the geographic composition of our pretax loss. The tax expense primarily relates to earnings from our international operations since we are currently unable to recognize the tax benefit from our U.S. losses as they may not be realized. The provision for income taxes was \$0.2 million for the first quarter of 2020, where the tax expense related to earnings from our international operations is only partially offset by the benefit from losses in the U.S.

Note 8 - Commitments and Contingencies

In the ordinary course of conducting our business, we become involved in litigation and other claims from private party actions, as well as judicial and administrative proceedings involving governmental authorities at the federal, state, and local levels. While the outcome of litigation or other proceedings against us cannot be predicted with certainty, management does not expect that any loss resulting from such litigation or other proceedings, in excess of any amounts accrued or covered by insurance, will have a material adverse impact on our consolidated financial statements.

Note 9 - Supplemental Disclosures to the Statements of Cash Flows

Supplemental disclosures to the statements of cash flows are presented below:

| | First Quarter | | | | | |
|-------------------------------|---------------|-------|----|-------|--|--|
| (In thousands) | | 2021 | | 2020 | | |
| Cash paid for: | | | | | | |
| Income taxes (net of refunds) | \$ | 1,810 | \$ | 1,888 | | |
| Interest | \$ | 889 | \$ | 991 | | |

Cash, cash equivalents, and restricted cash in the consolidated statements of cash flows consisted of the following:

| (In thousands) | March | 31, 2021 | December 31, 202 | | |
|---|-------|----------|------------------|--------|--|
| Cash and cash equivalents | \$ | 34,156 | \$ | 24,197 | |
| Restricted cash (included in prepaid expenses and other current assets) | | 5,849 | | 6,151 | |
| Cash, cash equivalents, and restricted cash | \$ | 40,005 | \$ | 30,348 | |

Note 10 - Segment Data

Summarized operating results for our reportable segments are shown in the following table (net of inter-segment transfers):

| | First (| ()uart | er |
|-------------------------------|---------------|--------|---------|
| (In thousands) | 2021 | | 2020 |
| Revenues | | | |
| Fluids systems | \$ 87,849 | \$ | 132,805 |
| Industrial solutions | 53,323 | | 31,745 |
| Total revenues | \$ 141,172 | \$ | 164,550 |
| | | | |
| Operating income (loss) | | | |
| Fluids systems | \$ (6,767) | \$ | (2,268) |
| Industrial solutions | 13,130 | | 3,062 |
| Corporate office | (5,819) | | (6,680) |
| Total operating income (loss) | \$ 544 | \$ | (5,886) |

The following table presents further disaggregated revenues for the Fluids Systems segment:

| | | er | | |
|-------------------------------|----|--------|----|---------|
| (In thousands) | | 2021 | | 2020 |
| United States | \$ | 47,670 | \$ | 73,660 |
| Canada | | 12,663 | | 13,260 |
| Total North America | | 60,333 | | 86,920 |
| | | | | |
| EMEA | | 25,459 | | 42,137 |
| Other | | 2,057 | | 3,748 |
| Total International | | 27,516 | | 45,885 |
| | | | | |
| Total Fluids Systems revenues | \$ | 87,849 | \$ | 132,805 |

The following table presents further disaggregated revenues for the Industrial Solutions segment:

| | | First Qua | arter |
|-------------------------------------|----|-----------|--------|
| (In thousands) | 2 | 021 | 2020 |
| Product sales revenues | \$ | 20,037 \$ | 4,142 |
| Rental revenues | | 17,079 | 13,502 |
| Service revenues | | 11,654 | 14,101 |
| Industrial blending revenues (1) | | 4,553 | _ |
| Total Industrial Solutions revenues | \$ | 53,323 \$ | 31,745 |

(1) Industrial blending operations began in the second quarter of 2020. Results for the industrial blending component are presented in Industrial Solutions beginning in the fourth quarter of 2020. Results prior to the fourth quarter of 2020 were reported in Fluids Systems and not adjusted as they were not material.

We recognized \$1.4 million of charges for inventory write-downs and severance costs in the first quarter of 2020, with \$1.2 million in the Fluids Systems segment and \$0.2 million in the Corporate office.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of our financial condition, results of operations, liquidity, and capital resources should be read in conjunction with the unaudited condensed consolidated financial statements and notes thereto included in this report as well as our Annual Report on Form 10-K for the year ended December 31, 2020. Our first quarter represents the three-month period ended March 31. Unless otherwise noted, all currency amounts are stated in U.S. dollars. The reference to a "Note" herein refers to the accompanying Notes to Unaudited Condensed Consolidated Financial Statements contained in Item 1 "Financial Statements."

Overview

We are a geographically diversified supplier providing products, as well as rentals and services. We operate our business through two reportable segments: Fluids Systems, which primarily serves oil and natural gas exploration and production ("E&P") customers, and Industrial Solutions, which serves various markets including electrical utilities, E&P, pipeline, renewable energy, petrochemical, construction and other industries.

Our long-term strategy includes key foundational elements that are intended to enhance long-term shareholder value creation:

- <u>End-market diversification</u> To help reduce our dependency on customers in the volatile E&P industry, improve the stability in cash flow generation and returns on invested capital, and provide growth opportunities into new markets, we have focused our efforts over the past several years on diversifying our presence outside of our historical E&P customer base. These efforts have been primarily focused within our Site and Access Solutions business, where we have prioritized growth in electrical utilities, pipeline, renewable energy, and construction markets. In the first quarter of 2021, our Industrial Solutions segment generated \$53 million of revenues, including approximately \$45 million from electrical utilities and other non-E&P markets. The continued diversification of our revenues, including end-markets that are likely to benefit from ongoing energy transition efforts around the world, such as electrical utilities, renewable energy, and geothermal, remains a strategic priority going forward, and we anticipate that our capital investments will primarily focus on industrial end-market expansion.
- Provide products that enhance environmental sustainability.— Our Company has a long history of providing environmentally-friendly technologies to our customers. In the Industrial Solutions segment, we believe the lightweight design of our fully recyclable DURA-BASE® matting system provides a distinct environmental advantage for our customers as compared to alternative wood mat products in the market, by eliminating deforestation required to produce wood mat products while also reducing CO₂ emissions associated with product transportation. In our Fluids Systems segment, our family of high-performance water-based fluids systems, which we market as Evolution® and DeepDrill® systems, are designed to enhance drilling performance while also providing a variety of environmental benefits relative to traditional oil-based fluids. The continued advancement of technology that provides our customers with economic benefits, while also enhancing their environmental and safety programs, remains a priority for our research and development efforts.

Our Fluids Systems operating results remain dependent on oil and natural gas drilling activity levels in the markets we serve and the nature of the drilling operations (including the depth and whether the wells are drilled vertically or horizontally), which governs the revenue potential of each well. Drilling activity levels, in turn, depend on a variety of factors, including oil and natural gas commodity pricing, inventory levels, product demand, and regulatory restrictions. Oil and natural gas prices and activity are cyclical and volatile, and this market volatility has a significant impact on our operating results.

While our Fluids Systems revenue potential is driven by a number of factors including those described above, rig count data remains the most widely accepted indicator of drilling activity. Average North American rig count data for the first quarter of 2021 as compared to the first quarter of 2020 is as follows:

| | First Q | uarter | 2021 vs 2020 | | | |
|-------------------------|-----------|--------|--------------|-------|--|--|
| | 2021 2020 | | | % | | |
| U.S. Rig Count | 390 | 785 | (395) | (50)% | | |
| Canada Rig Count | 138 | 196 | (58) | (30)% | | |
| North America Rig Count | 528 | 981 | (453) | (46)% | | |

Source: Baker Hughes Company

During March 2020, oil prices collapsed due to geopolitical events along with the worldwide effects of the COVID-19 pandemic. As a result, U.S. rig count declined significantly beginning in late March 2020 before reaching a low of 244 in mid-August 2020. The average U.S. rig count increased 27% sequentially in the first quarter of 2021 and was 440 as of April 30, 2021. We anticipate that market activity will continue to improve from current levels, although the ongoing impacts of the COVID-19 pandemic and an uncertain economic environment make the timing and pace of recovery difficult to predict. The Canada rig count was 51 as of April 30, 2021, largely reflecting the normal seasonality for this market, with the highest rig count levels generally observed in the first quarter of each year, prior to Spring break-up.

Outside of North America land markets, drilling activity is generally more stable as this drilling activity is based on longer-term economic projections and multi-year drilling programs, which typically reduces the impact of short-term changes in commodity prices on overall drilling activity. However, operations in several countries in the EMEA region experienced activity disruptions and project delays beginning in March 2020 and continuing into 2021, driven by government-imposed restrictions on movements of personnel, quarantines of staffing, and logistical limitations as a result of the COVID-19 pandemic. We expect these disruptions and project delays will continue to impact international activity levels in the near-term, and while we anticipate a general improvement in customer activity as we progress through 2021, the impact from the duration and magnitude of the ongoing health pandemic and related government responses are very difficult to predict.

In response to the 2020 market changes and reduced demand for our products and services as a result of the decline in oil prices and the COVID-19 pandemic, we took a number of actions during 2020 aimed at conserving cash and protecting our liquidity, which included the implementation of cost reduction programs, including workforce reductions, employee furloughs, the suspension of the Company's matching contributions to its U.S. defined contribution plan, and temporary salary reductions effective April 1, 2020 for a significant portion of U.S. employees. We recognized total charges of \$29.2 million in 2020, including \$1.4 million during the first quarter of 2020 for inventory write-downs and severance charges. While we have taken certain actions to reduce our workforce and cost structure, our business contains high levels of fixed costs, including significant facility and personnel expense. Beginning in the second quarter of 2021, we restored salaries to pre-reduction levels for a portion of our non-executive U.S. employees and reinstituted the Company matching contribution for our U.S. defined contribution plan. We continue to evaluate under-performing areas within the Fluids Systems segment as well as opportunities to further enable a more efficient and scalable cost structure. In the absence of a longer-term increase in activity levels, we may incur future charges related to cost reduction efforts or potential asset impairments, which may negatively impact our future results.

Segment Overview

Fluids Systems - Our Fluids Systems segment, which generated 62% of consolidated revenues for the first quarter of 2021, provides drilling, completion, and stimulation fluids products and related technical services to customers for oil, natural gas, and geothermal projects primarily in North America and Europe, the Middle East and Africa ("EMEA"), as well as certain countries in Asia Pacific and Latin America. Despite the continuing effects of COVID-19 impacting international customer activity, expansion outside of North America, including the penetration of international oil companies ("IOCs") and national oil companies ("NOCs"), remains a key element of our Fluids Systems strategy, which has historically helped to stabilize segment revenues while North American oil and natural gas exploration activities have fluctuated significantly. Revenues from IOC and NOC customers represented approximately 31% of Fluids Systems segment revenues for the first quarter of 2021 compared to 38% for the first quarter of 2020, with the decrease primarily due to COVID-related activity disruptions and project delays.

Industrial Solutions - Our Industrial Solutions segment, which generated 38% of consolidated revenues for the first quarter of 2021, provides engineered composite matting system rentals utilized for temporary worksite access, along with related site construction and services to customers in various markets including electrical utilities, E&P, pipeline, renewable energy, petrochemical, construction and other industries, primarily in the United States and Europe. We also sell our manufactured composite mats to customers around the world, with electrical utilities being the primary end-market. In addition, we began leveraging our chemical blending capacity and technical expertise into industrial blending operations, and in response

to the increasing market demand for cleaning products resulting from the COVID-19 pandemic, began producing disinfectants and industrial cleaning products in 2020. The scale-up of production was completed by the end of the third quarter of 2020, which effectively repositioned our chemical blending operation located in Conroe, Texas to support industrial end-markets. Beginning prospectively in the fourth quarter of 2020, the assets and operating results associated with these industrial blending operations are included in the Industrial Solutions segment, while the historical results from earlier in 2020, which were immaterial, are included in the Fluids Systems segment.

The expansion of our rental and service activities in electrical utilities and other non-E&P markets remains a strategic priority for us due to the market's relative stability compared to E&P, as well as the magnitude of this market growth opportunity, including the potential positive impact from the energy transition. During 2020, our business was impacted by the COVID-19 pandemic, as customers delayed purchases and planned projects citing COVID-related market uncertainty, permitting delays, and logistical restrictions. The Industrial Solutions segment rental and service revenues from non-E&P markets increased to approximately \$20 million for the first quarter of 2021, compared to approximately \$15 million for the first quarter of 2020. Product sales revenues largely reflect sales to electrical utilities customers and other non-E&P markets, and typically fluctuate based on the timing of customer orders. Total segment revenues from non-E&P markets were \$45 million (84% of segment revenues) for the first quarter of 2021, more than doubling the \$19 million (60% of segment revenues) generated in the first quarter of 2020, benefiting from pent-up demand associated with COVID-related project delays in 2020 along with a broader market recovery, particularly in the electrical utilities sector. While we expect customer activity, particularly in the electrical utilities sector, will remain robust as we progress through 2021, the demand for both rental projects and product sales remains dependent on our customers continuing confidence in the broader economic recovery.

First Quarter of 2021 Compared to First Quarter of 2020

Consolidated Results of Operations

Summarized results of operations for the first quarter of 2021 compared to the first quarter of 2020 are as follows:

| | First (| (Juarte | er | 2021 vs 2020 | | | |
|--|---------------|---------|----------|----------------|-------|--|--|
| (In thousands) | 2021 | | 2020 | \$ | % | | |
| Revenues | \$ 141,172 | \$ | 164,550 | \$ (23,378) | (14)% | | |
| Cost of revenues | 119,991 | | 146,084 | (26,093) | (18)% | | |
| Selling, general and administrative expenses | 20,911 | | 24,696 | (3,785) | (15)% | | |
| Other operating income | (274) | | (344) | 70 | NM | | |
| Operating income (loss) | 544 | | (5,886) | 6,430 | NM | | |
| | | | | | | | |
| Foreign currency exchange (gain) loss | (332) | | 1,982 | (2,314) | NM | | |
| Interest expense, net | 2,408 | | 3,201 | (793) | (25)% | | |
| Loss on extinguishment of debt | 790 | | 915 | (125) | NM | | |
| Loss before income taxes | (2,322) | | (11,984) | 9,662 | 81 % | | |
| | | | | | | | |
| Provision for income taxes | 3,040 | | 164 | 2,876 | NM | | |
| Net loss | \$ (5,362) | \$ | (12,148) | \$ 6,786 | (56)% | | |

Revenues

Revenues decreased 14% to \$141.2 million for the first quarter of 2021, compared to \$164.6 million for the first quarter of 2020. This \$23.4 million decrease includes a \$8.2 million (7%) decrease in revenues in North America, comprised of a \$26.6 million decrease in the Fluids Systems segment partially offset by an \$18.4 million increase in the Industrial Solutions segment. Revenues from our North America operations decreased primarily due to the 46% reduction in North American rig count partially offset by the significant growth in non-E&P markets. Revenues from our international operations decreased by \$15.2 million (31%), primarily driven by activity disruptions and project delays resulting from the COVID-19 pandemic. Additional information regarding the change in revenues is provided within the operating segment results below.

Cost of revenues

Cost of revenues decreased 18% to \$120.0 million for the first quarter of 2021, compared to \$146.1 million for the first quarter of 2020. This \$26.1 million decrease was primarily driven by the 14% decrease in revenues described above.

Selling, general and administrative expenses

Selling, general and administrative expenses decreased \$3.8 million to \$20.9 million for the first quarter of 2021, compared to \$24.7 million for the first quarter of 2020. This decrease was primarily driven by reduced personnel costs, including the benefit of cost reduction programs implemented in 2020. Selling, general and administrative expenses as a percentage of revenues was 14.8% for the first quarter of 2021 compared to 15.0% for the first quarter of 2020.

Foreign currency exchange

Foreign currency exchange was a \$0.3 million gain for the first quarter of 2021 compared to a \$2.0 million loss for the first quarter of 2020, and reflects the impact of currency translation on assets and liabilities (including intercompany balances) that are denominated in currencies other than functional currencies.

Interest expense, net

Interest expense was \$2.4 million for the first quarter of 2021 compared to \$3.2 million for the first quarter of 2020. Interest expense for the first quarter of 2021 and 2020 includes \$1.1 million and \$1.6 million, respectively, in non-cash amortization of original issue discount and debt issuance costs. The decrease in interest expense is primarily due to lower debt balances.

Loss on extinguishment of debt

In the first quarter of 2021 and 2020, we repurchased \$18.3 million and \$14.5 million, respectively, of our Convertible Notes in the open market for \$18.1 million and \$13.8 million, respectively. The \$0.8 million loss and \$0.9 million loss for the first quarter of 2021 and 2020, respectively, reflects the difference in the amount paid and the net carrying value of the extinguished debt, including original issue discount and debt issuance costs.

Provision for income taxes

The provision for income taxes was \$3.0 million for the first quarter of 2021, despite reporting a pretax loss for the period, primarily reflecting the impact of the geographic composition of our pretax loss. The tax expense primarily relates to earnings from our international operations since we are currently unable to recognize the tax benefit from our U.S. losses as they may not be realized. The provision for income taxes was \$0.2 million for the first quarter of 2020, where the tax expense related to earnings from our international operations is only partially offset by the benefit from losses in the U.S.

Operating Segment Results

Summarized financial information for our reportable segments is shown in the following table (net of inter-segment transfers):

| | | First (| Quar | 2021 vs 2020 | | | |
|-------------------------------|----|---------|------|--------------|----|----------|-------|
| (In thousands) | | 2021 | | 2020 | | \$ | % |
| Revenues | | | | | | | |
| Fluids systems | \$ | 87,849 | \$ | 132,805 | \$ | (44,956) | (34)% |
| Industrial solutions | | 53,323 | | 31,745 | | 21,578 | 68 % |
| Total revenues | \$ | 141,172 | \$ | 164,550 | \$ | (23,378) | (14)% |
| | _ | | | | | | |
| Operating income (loss) | | | | | | | |

| Industrial solutions | | 24.6 % | | 9.6 % | | | |

Fluids Systems

Revenues

Total revenues for this segment consisted of the following:

| | First C |)uart | 2021 vs 2020 | | | |
|-------------------------------|--------------|-------|--------------|----|----------|-------|
| (In thousands) | 2021 | | 2020 | | \$ | % |
| United States | \$ 47,670 | \$ | 73,660 | \$ | (25,990) | (35)% |
| Canada | 12,663 | | 13,260 | | (597) | (5)% |
| Total North America | 60,333 | | 86,920 | | (26,587) | (31)% |
| | | | | | | |
| EMEA | 25,459 | | 42,137 | | (16,678) | (40)% |
| Other | 2,057 | | 3,748 | | (1,691) | (45)% |
| Total International | 27,516 | | 45,885 | | (18,369) | (40)% |
| | | | | | | |
| Total Fluids Systems revenues | \$ 87,849 | \$ | 132,805 | \$ | (44,956) | (34)% |

North America revenues decreased 31% to \$60.3 million for the first quarter of 2021, compared to \$86.9 million for the first quarter of 2020. This decrease was primarily attributable to a \$19.1 million decrease from U.S. land markets driven by the 50% decline in U.S. rig count partially offset by an increase in market share, as well as a \$6.9 million decrease from offshore Gulf of Mexico driven primarily by changes in customer drilling and completion activity levels. For the first quarter of 2021, U.S. revenues included \$39.0 million from land markets and \$8.7 million from offshore Gulf of Mexico.

Internationally, revenues decreased 40% to \$27.5 million for the first quarter of 2021, compared to \$45.9 million for the first quarter of 2020. The decrease was driven by lower activity primarily attributable to COVID-19 disruptions impacting substantially all key markets.

Operating income (loss)

The Fluids Systems segment incurred an operating loss of \$6.8 million for the first quarter of 2021, reflecting a \$4.5 million increase from the \$2.3 million operating loss incurred in the first quarter of 2020. The Fluids Systems operating loss for 2020 also included \$1.2 million of charges related to inventory write-downs and severance costs. The increase in operating loss includes a \$5.0 million decline from international operations and a \$0.7 million decline from North America operations, which are primarily attributable to the changes in revenues described above, partially offset by the benefit of cost reduction programs implemented in 2020.

Industrial Solutions

Revenues

Total revenues for this segment consisted of the following:

| | First Quarter | | | | | 2021 vs 2020 | | | |
|-------------------------------------|---------------|--------|----|----------|----|--------------|-------|--|--|
| (In thousands) | | 2021 | | 2020 | | \$ | % | | |
| Product sales revenues | \$ | 20,037 | \$ | 4,142 | \$ | 15,895 | 384 % | | |
| Rental and service revenues | | 28,733 | | 27,603 | | 1,130 | 4 % | | |
| Industrial blending revenues | | 4,553 | | <u> </u> | | 4,553 | NM | | |
| Total Industrial Solutions revenues | | 53,323 | \$ | 31,745 | \$ | 21,578 | 68 % | | |

Revenues from product sales, which typically fluctuate based on the timing of mat orders from customers, was favorably impacted in the first quarter of 2021 by pent-up demand following the COVID-19 pandemic, while the first quarter of 2020 was negatively impacted by customers delaying purchases due to the COVID-19 pandemic and market uncertainty. Rental and service revenues increased \$1.1 million to \$28.7 million for the first quarter of 2021, which includes a \$4.7 million increase from non-E&P customers partially offset by a \$3.6 million decrease from E&P customers. The increase from non-E&P customers reflects our continued expansion into these markets, including an approximately 35% increase in revenues from the electrical utilities sector. The revenue decrease from E&P customers primarily resulted from the lower U.S. drilling activity, along with our focus on supporting the more stable non-E&P customer end-markets.

Operating income

The Industrial Solutions segment generated operating income of \$13.1 million for the first quarter of 2021 compared to \$3.1 million for the first quarter of 2020, the increase being primarily attributable to the change in revenues as described above.

Corporate Office

Corporate office expenses decreased \$0.9 million to \$5.8 million for the first quarter of 2021, compared to \$6.7 million for the first quarter of 2020. This decrease was primarily driven by lower personnel costs in the first quarter of 2021, including the benefit of cost reduction programs implemented in 2020.

Liquidity and Capital Resources

Net cash provided by operating activities was \$27.8 million for the first quarter of 2021 compared to \$4.4 million for the first quarter of 2020. During the first quarter of 2021, net loss adjusted for non-cash items provided cash of \$7.0 million, while changes in working capital provided cash of \$20.8 million.

Net cash used in investing activities was \$0.6 million for the first quarter of 2021, including capital expenditures of \$8.6 million, substantially offset by \$8.0 million in proceeds from the sale of assets. The majority of the proceeds from the sale of assets reflect used mats from our rental fleet, which are part of the commercial offering of our Site and Access Solutions business. Nearly all of our capital expenditures during the first quarter of 2021 were directed to supporting our Industrial Solutions segment, including \$6.9 million of investments in the mat rental fleet, primarily supporting the increasing demand from the electrical utilities sector.

Net cash used in financing activities was \$16.6 million for the first quarter of 2021, which primarily includes \$18.1 million in repurchases of our Convertible Notes and a net repayment of \$8.1 million on our ABL Facility, partially offset by \$8.1 million of net proceeds from a U.K. term loan facility.

Substantially all our \$34.2 million of cash on hand at March 31, 2021 resides in our international subsidiaries. Subject to maintaining sufficient cash requirements to support the strategic objectives of these international subsidiaries and complying with applicable exchange or cash controls, we expect to continue to repatriate excess cash from these international subsidiaries. As we progress through 2021, we anticipate that working capital will likely increase in the near term with future working capital requirements for our operations generally fluctuating directionally with revenues. We expect capital expenditures in the near term to focus on industrial end-market expansion opportunities that provide stable cash flow generation. In addition, we may continue to purchase our Convertible Notes under our existing repurchase program prior to the December 2021 maturity.

Availability under our ABL Facility also provides additional liquidity as discussed further below. Total availability under the ABL Facility will fluctuate directionally based on the level of eligible U.S. accounts receivable, inventory, and, subject to satisfaction of certain financial covenants as described below, composite mats included in the rental fleet. As of May 3, 2021, our total availability under the ABL Facility was \$82.6 million, of which \$16.0 million was drawn, resulting in remaining availability of \$66.5 million. This availability under the ABL Facility excludes \$24.2 million related to eligible rental mats as we failed to satisfy the required minimum consolidated fixed charge coverage ratio, as measured on the trailing twelve-month period ended March 31, 2021. Based on our current projections of operating results through the first half of 2021, we expect to satisfy the financial covenants required such that the eligible rental mats would again be included in the borrowing availability under the ABL Facility following the second quarter of 2021.

We expect our available cash on-hand, cash generated by operations, and the expected availability under our ABL Facility to be adequate to fund our current operations during the next 12 months and the repurchase or repayment of the 2021 Convertible Notes. We also continue to evaluate other sources of additional liquidity to support our longer-term liquidity options, which include possible financing or alternative arrangements secured by certain assets in the U.S. or our international operations.

Our capitalization is as follows:

| (In thousands) | March 31, 2021 |] | December 31, 2020 | |
|--|----------------|---------|-------------------|---------|
| Convertible Notes | \$ | 48,567 | \$ | 66,912 |
| ABL Facility | | 11,000 | | 19,100 |
| Other debt | | 15,137 | | 5,371 |
| Unamortized discount and debt issuance costs | | (2,462) | | (4,221) |
| Total debt | \$ | 72,242 | \$ | 87,162 |
| | | _ | | |
| Stockholder's equity | | 480,922 | | 488,032 |
| Total capitalization | \$ | 553,164 | \$ | 575,194 |
| | | | | |
| Total debt to capitalization | | 13.1 % | | 15.2 % |

Convertible Notes. In December 2016, we issued \$100.0 million of unsecured convertible senior notes ("Convertible Notes") that mature on December 1, 2021, of which \$48.6 million principal amount was outstanding at March 31, 2021. The notes bear interest at a rate of 4.0% per year, payable semiannually in arrears on June 1 and December 1 of each year.

Holders may convert the notes at their option at any time prior to the close of business on the business day immediately preceding June 1, 2021, only under the following circumstances:

- during any calendar quarter (and only during such calendar quarter) if the last reported sale price of our common stock for at least 20 trading days (regardless of whether consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price of the notes in effect on each applicable trading day;
- during the five business day period after any five consecutive trading day period in which the trading price per \$1,000 principal amount of notes for each trading day was less than 98% of the last reported sale price of our common stock on such date multiplied by the conversion rate on each such trading day; or
- upon the occurrence of specified corporate events, as described in the indenture governing the notes, such as a consolidation, merger, or share exchange.

On or after June 1, 2021 until the close of business on the business day immediately preceding the maturity date, holders may convert their notes at any time, regardless of whether any of the foregoing conditions have been satisfied. As of May 3, 2021, the notes were not convertible.

The notes are convertible into, at our election, cash, shares of common stock, or a combination of both, subject to satisfaction of specified conditions and during specified periods, as described above. If converted, we currently intend to pay cash for the principal amount of the notes converted. The conversion rate is 107.1381 shares of our common stock per \$1,000 principal amount of notes (equivalent to an initial conversion price of \$9.33 per share of common stock), subject to adjustment in certain circumstances. We may not redeem the notes prior to their maturity date.

During the first quarter of 2021, we repurchased \$18.3 million of our Convertible Notes in the open market for a total cost of \$18.1 million, and recognized a net loss of \$0.8 million reflecting the difference in the amount paid and the net carrying value of the extinguished debt, including original issue discount and debt issuance costs.

Asset-Based Loan Facility. In May 2016, we entered into an asset-based revolving credit agreement, which was amended in October 2017 and in March 2019 (as amended, the "ABL Facility"). The ABL Facility provides financing of up to \$200.0 million available for borrowings (inclusive of letters of credit) and can be increased up to a maximum capacity of \$275.0 million, subject to certain conditions.

The ABL Facility terminates in March 2024; however, the ABL Facility has a springing maturity date that will accelerate the maturity of the ABL Facility to September 1, 2021 if, prior to such date, the Convertible Notes have not been repurchased, redeemed, refinanced, exchanged or otherwise satisfied in full or we have not escrowed an amount of funds, that together with the amount that we establish as a reserve against our borrowing capacity, is sufficient for the future settlement of the Convertible Notes at their maturity. The ABL Facility requires a minimum consolidated fixed charge coverage ratio of 1.25 to 1.0 calculated based on the trailing twelve-month period ended June 30, 2021 and remaining unused availability of at least \$25.0 million to utilize borrowings or assignment of availability under the ABL Facility towards funding the repayment of the Convertible Notes.

Borrowing availability under the ABL Facility is calculated based on eligible U.S. accounts receivable, inventory, and, subject to satisfaction of certain financial covenants as described below, composite mats included in the rental fleet, net of reserves and limits on such assets included in the borrowing base calculation. To the extent pledged by us, the borrowing base calculation also includes the amount of eligible pledged cash. The lender may establish such reserves, in part based on appraisals of the asset base, and other limits at its discretion which could reduce the amounts otherwise available under the ABL Facility. Availability associated with eligible rental mats will also be subject to maintaining a minimum consolidated fixed charge coverage ratio of 1.5 to 1.0 and at least \$1.0 million of operating income for the Site and Access Solutions business, each calculated based on a trailing twelve-month period.

As noted above, we do not currently satisfy the minimum consolidated fixed charge coverage ratio that is required to include eligible rental mats in the borrowing availability under the ABL Facility. We expect to satisfy the minimum consolidated fixed charge coverage ratio as required to include eligible rental mats in the borrowing availability under the ABL Facility following the second quarter of 2021 and expect to satisfy the June 30, 2021 ABL Facility requirements to be able to utilize borrowings or assignment of availability under the ABL Facility towards funding the repayment of the Convertible Notes prior to September 1, 2021. If we are unable to satisfy the minimum consolidated fixed charge coverage ratios following the second quarter of 2021, we would further evaluate options, which may include a waiver or amendment to our ABL Facility. Any waiver or amendment to the ABL Facility, if required, would be expected to increase the cost of our borrowings and may impose additional limitations over certain types of activities, and we can give no assurance that we will be able to obtain such amendment or waiver on favorable terms or at all.

Under the terms of the ABL Facility, we may elect to borrow at a variable interest rate based on either, (1) LIBOR subject to a floor of zero or (2) a base rate equal to the highest of: (a) the federal funds rate plus 50 basis points, (b) the prime rate of Bank of America, N.A. and (c) LIBOR, subject to a floor of zero, plus 100 basis points, plus, in each case, an applicable margin per annum. The applicable margin ranges from 150 to 200 basis points for LIBOR borrowings, and 50 to 100 basis points for base rate borrowings, based on the consolidated fixed charge coverage ratio as defined in the ABL Facility. As of March 31, 2021, the applicable margin for borrowings under our ABL Facility was 200 basis points with respect to LIBOR borrowings and 100 basis points with respect to base rate borrowings. The weighted average interest rate for the ABL Facility was 2.1% at March 31, 2021. In addition, we are required to pay a commitment fee on the unused portion of the ABL Facility ranging from 25 to 37.5 basis points, based on the level of outstanding borrowings, as defined in the ABL Facility. As of March 31, 2021, the applicable commitment fee was 37.5 basis points.

The ABL Facility is a senior secured obligation, secured by first liens on substantially all of our U.S. tangible and intangible assets, and a portion of the capital stock of our non-U.S. subsidiaries has also been pledged as collateral. The ABL Facility contains customary operating covenants and certain restrictions including, among other things, the incurrence of additional debt, liens, dividends, asset sales, investments, mergers, acquisitions, affiliate transactions, stock repurchases and other restricted payments. The ABL Facility also requires a minimum consolidated fixed charge coverage ratio of 1.0 to 1.0 calculated based on a trailing twelve-month period if availability under the ABL Facility falls below \$22.5 million. Based on our current projections, we do not expect availability under the ABL Facility to fall below \$22.5 million. In addition, the ABL Facility contains customary events of default, including, without limitation, a failure to make payments under the facility, acceleration of more than \$25.0 million of other indebtedness, certain bankruptcy events, and certain change of control events.

Other Debt. In February 2021, a U.K. subsidiary entered a £6.0 million (approximately \$8.3 million) term loan facility that matures in February 2024, the proceeds of which were used to pay down the ABL Facility. The term loan bears interest at a rate of LIBOR plus a margin of 3.4% per year, payable in quarterly installments of £375,000 plus interest beginning March 2021 and a £1.5 million payment due at maturity. We had \$7.8 million outstanding under this arrangement at March 31, 2021.

Certain of our other foreign subsidiaries maintain local credit arrangements consisting primarily of lines of credit or overdraft facilities which are generally renewed on an annual basis. We utilize local financing arrangements in our foreign operations in order to provide short-term local liquidity needs. We had \$6.5 million and \$3.5 million outstanding under these arrangements at March 31, 2021 and December 31, 2020, respectively.

In addition, at March 31, 2021, we had \$50.2 million in outstanding letters of credit, performance bonds, and other guarantees for which certain of the letters of credit are collateralized by \$5.8 million in restricted cash.

Critical Accounting Estimates and Policies

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP"), which requires management to make estimates and assumptions that affect the reported amounts and disclosure. Significant estimates used in preparing our consolidated financial statements include estimated cash flows and fair values used for impairments of long-lived assets, including goodwill and other intangibles, and valuation allowances for deferred tax assets. Our estimates are based on historical experience and on our future expectations that we believe to be reasonable. The combination of these factors forms the basis for making judgments about the carrying values of assets and

liabilities that are not readily apparent from other sources. Actual results may differ from our current estimates and those differences may be material.

For additional discussion of our critical accounting estimates and policies, see "Management's Discussion and Analysis of Financial Condition and Results of Operations" included in our Annual Report on Form 10-K for the year ended December 31, 2020. Our critical accounting estimates and policies have not materially changed since December 31, 2020.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risk from changes in interest rates and changes in foreign currency exchange rates. A discussion of our primary market risk exposure in financial instruments is presented below.

Interest Rate Risk

At March 31, 2021, we had total principal amounts outstanding under financing arrangements of \$74.7 million, including \$48.6 million of borrowings under our Convertible Notes which bear interest at a fixed rate of 4.0%, as well as \$11.0 million of borrowings under our ABL Facility and \$7.8 million of borrowings under a U.K. term loan which are subject to a variable interest rates as determined by the respective debt agreements. The weighted average interest rate at March 31, 2021 for the ABL Facility and the U.K. term loan was 2.1% and 3.4%, respectively. Based on the balance of variable rate debt at March 31, 2021, a 100 basis-point increase in short-term interest rates would have increased annual pre-tax interest expense by \$0.2 million.

Foreign Currency Risk

Our principal foreign operations are conducted in certain areas of EMEA, Canada, Asia Pacific, and Latin America. We have foreign currency exchange risks associated with these operations, which are conducted principally in the foreign currency of the jurisdictions in which we operate including European euros, Kuwaiti dinar, Algerian dinar, Romanian new leu, Canadian dollars, British pounds, and Australian dollars. Historically, we have not used off-balance sheet financial hedging instruments to manage foreign currency risks when we enter into a transaction denominated in a currency other than our local currencies.

ITEM 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this quarterly report. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of March 31, 2021, the end of the period covered by this quarterly report.

Changes in Internal Control Over Financial Reporting

There were no changes in internal control over financial reporting during the quarter ended March 31, 2021 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. Legal Proceedings

None.

ITEM 1A. Risk Factors

There have been no material changes during the period ended March 31, 2021 in our "Risk Factors" as discussed in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2020.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

- a) Not applicable
- b) Not applicable
- c) The following table details our repurchases of shares of our common stock for the three months ended March 31, 2021:

| Period | | Total Number of Shares Purchased | Av | erage Price Paid Per Share | Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs | Maximum Approximate Dollar Value of Shares that May Yet be Purchased Under Plans or Programs (\$ in Millions) | | | |
|---------------|-------|-------------------------------------|----|-------------------------------|---|--|------|--|--|
| January 2021 | | _ | \$ | _ | _ | \$ | 51.9 | | |
| February 2021 | | _ | \$ | _ | _ | \$ | 39.1 | | |
| March 2021 | | 1,482 | \$ | 3.92 | _ | \$ | 33.8 | | |
| | Total | 1,482 | | | | | | | |

During the three months ended March 31, 2021, we purchased an aggregate of 1,482 shares surrendered in lieu of taxes under vesting of restricted shares.

In November 2018, our Board of Directors authorized changes to our securities repurchase program. These changes increased the authorized amount under the repurchase program to \$100.0 million, available for repurchases of any combination of our common stock and our Convertible Notes.

Our repurchase program authorizes us to purchase outstanding shares of our common stock or Convertible Notes in the open market or as otherwise determined by management, subject to certain limitations under the ABL Facility and other factors. The repurchase program has no specific term. Repurchases are expected to be funded from operating cash flows, available cash on hand, and borrowings under our ABL Facility. As part of the share repurchase program, our management has been authorized to establish trading plans under Rule 10b5-1 of the Securities Exchange Act of 1934. As of March 31, 2021, we had \$33.8 million remaining under the program.

During the three months ended March 31, 2021, we repurchased \$18.3 million of our Convertible Notes in the open market under the repurchase program for a total cost of \$18.1 million. There were no shares of common stock repurchased under the repurchase program during the three months ended March 31, 2021.

ITEM 3. Defaults Upon Senior Securities

None.

ITEM 4. Mine Safety Disclosures

The information concerning mine safety violations and other regulatory matters required by section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K is included in Exhibit 95.1 of this Quarterly Report on Form 10-Q, which is incorporated by reference.

ITEM 5. Other Information

None.

ITEM 6. Exhibits

The exhibits listed are filed as part of, or incorporated by reference into, this Quarterly Report on Form 10-Q.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

Date: May 5, 2021

NEWPARK RESOURCES, INC. (Registrant)

By: /s/ Paul L. Howes

Paul L. Howes

President and Chief Executive Officer (Principal Executive Officer)

By: /s/ Gregg S. Piontek

Gregg S. Piontek Senior Vice President and Chief Financial Officer (Principal Financial Officer)

By: /s/ Douglas L. White

Douglas L. White Vice President, Chief Accounting Officer and Treasurer (Principal Accounting Officer)

Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

I, Paul L. Howes, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q of Newpark Resources, Inc.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Paul L. Howes

President and Chief Executive Officer

Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

I, Gregg S. Piontek, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q of Newpark Resources, Inc.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Gregg S. Piontek

Senior Vice President and Chief Financial Officer

Under the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), each operator of a coal or other mine is required to include certain mine safety results in its periodic reports filed with the Securities and Exchange Commission ("SEC"). Our subsidiary, Excalibar Minerals LLC ("Excalibar"), engages in the processing of barite ore and is subject to the jurisdiction of the Mine Safety and Health Administration ("MSHA"). For that reason, we are providing below the required mine safety data for the four specialized barite and calcium carbonate grinding facilities operated by Excalibar that are subject to the regulation by MSHA under the Federal Mine Safety and Health Act of 1977 (the "Mine Act").

As required by the reporting requirements regarding mine safety included in Section 1503 of the Dodd-Frank Act and the SEC's final rules promulgated thereunder, the table below presents the following information for the three months ended March 31, 2021 for each of the specialized facilities operated by our subsidiary:

- (a) The total number of Mine Act Section 104 significant and substantial citations received, which are for alleged violations of a mining safety standard or regulation where there exists a reasonable likelihood that the hazard could result in an injury or illness of a reasonably serious nature;
- (b) The total number of Mine Act Section 104(b) orders received, which are for an alleged failure to totally abate the subject matter of a Mine Act Section 104(a) citation within the period specified in the citation;
- (c) The total number of Mine Act Section 104(d) citations and orders received, which are for an alleged unwarrantable failure to comply with a mining safety standard or regulation;
- (d) The total number of flagrant violations under Section 110(b)(2) of the Mine Act received;
- (e) The total number of imminent danger orders issued under Section 107(a) of the Mine Act;
- (f) The total dollar value of proposed assessments from MSHA under the Mine Act;
- (g) The total number of mining-related fatalities;
- (h) Mine Act Section 104(e) written notices for an alleged pattern of violations of mandatory health or safety standards that are of such nature as could have significantly and substantially contributed to the cause and effect of a coal mine health or safety hazard, or the potential to have such a pattern; and
- (i) The total number of pending legal actions before the Federal Mine Safety and Health Review Commission as required by Section 1503(a)(3) of the Dodd-Frank Act. The number of legal actions pending as of March 31, 2021 that are:

For the Three Months Ended March 31, 2021

In evaluating the above information regarding mine safety and health, investors should take into account factors such as (i) the number of citations and orders will vary depending on the size of the coal mine or facility, (ii) the number of citations issued will vary from inspector-to-inspector and mine-to-mine, and (iii) citations and orders can be contested and appealed, and in that process, may be reduced in severity and amount, and are sometimes dismissed.
